

SMILEY[®] MONROE

Maximising Uptime

Introducing Zip Clip[®] the mechanically fastened replacement conveyor belt. Easy, quick and safe to fit, Zip Clip[®] acts as an insurance policy in the event of a breakdown - removing the need for a vulcanising team and getting your conveyor back up and running immediately.

SAVE COSTLY DOWNTIME

Example: Limestone quarry producing 1600 tonnes of material per day. On this site a breakdown can often mean two days of machine downtime whilst waiting on a vulcanising crew and replacement conveyor belt. **This downtime equates to a loss of \$31,582.** Having a Zip Clip[®] belt in stock to replace your most critical conveyor could have you back up and running up to 6 hours faster*. Once fitted & tensioned, a Zip Clip[®] belt can be run immediately.

ZIP CLIP[®]

WORLD'S FASTEST REPLACEMENT BELT

**NO SPECIALIST TRAINING
REQUIRED - FITTING
INSTRUCTIONS INCLUDED**

*Zip Clip[®] installation time savings are based on having a skilled vulcanising team on site with belts already prepared for vulcanising.

**GET BACK UP AND RUNNING
WITHIN 30 MINUTES** - no
need to wait on a splice team

MAXIMISE UPTIME!

Zip Clip[®] belt installation is
3.5 hours faster than cold
vulcanising & 6 hours faster
than hot vulcanising*

READY TO RUN

Once fitted and tensioned,
Zip Clip[®] belts are
immediately ready to run

**PU BELT CLEANER
FRIENDLY**

**IDEAL FOR SMALLER TAIL
PULLEYS**

REUSABLE

Armoured connecting pin
can be easily removed,
allowing Zip Clip[®] belts to
be reused

BELT TYPES

Zip Clip[®] belts available
as both flat and chevron

OVERBAND MAGNETS

Suitable for use with
overband magnets but not
metal detectors

FEATURES

SUPERIOR STRENGTH & STRAIGHTNESS

Superior splice strength and belt straightness compared to hammer-in rivet hinge fasteners

RECESSED SPLICE

Zip Clip® belt's factory-made recessed splice is belt cleaner (PU blades) and feed boot skirting (rubber & PU) friendly

CORROSION & WEAR RESISTANT

Stainless chromium-steel staples and stainless chromium-nickel armoured connecting pin designed for maximum wear resistance

LONGER SPLICE LIFE

Factory-made using hydraulic equipment ensures consistently high quality splice for longer life

ARMOURED CONNECTING PINS

Zip Clip® belts are supplied with 2 connecting pins (1 spare)

PULLING ON PART

2 pulling on parts are supplied with Zip Clip® belts 900mm wide and above

PIN INSERTION TOOL SOLD SEPERATELY

APPLICATIONS

Zip Clip® belts are supplied ready-to-fit to your most critical conveyor - maximising uptime in the event of a breakdown - designed for the toughest applications including:

- Mobile Crushing & Screening
- Aggregates
- Hard Rock Quarrying
- Recycling & Demolition
- Mining
- Environmental
